PREFABRICATED ELEMENTS

WINDOWS & DOORS | FROM A SINGLE SOURCE

TECHNICAL KNOW-HOW including

With RAICO prefabricated elements, you also benefit from the expertise and development experience of our specialists when ordering small quantities – without additional costs and time expenditure for your project.

Prefabricated components for windows and doors

With RAICO Bautechnik GmbH, you have a recognised specialist in sophisticated building envelopes at your side: we develop bespoke solutions for façades, windows and doors that are perfectly tailored to the requirements of our customers and partners.

As an additional service, we can also supply our RAICO window and door systems as ready-to-install prefabricated elements on request.

The benefits for your project: greater planning certainty, greater cost certainty and easier installation – even for one-off items and smaller quantities.

Working more productively with RAICO prefabricated elements

Large dimensions, small quantities and special solutions for windows and doors are usually costly and time-consuming.

Take advantage of RAICO's prefabricated components to make your operations even more efficient:

- Professional and functional installation of all necessary components (fittings, motors, locks, etc.)
- Safe and properly packed transport for ready-to-install window and door elements
- Delivery on request – to your company or directly to the construction site
- Ability to provide escape and panic doors
- Provision of production documentation as well as maintenance and care manuals

RAICO
